Preface

Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Binding of Small Molecules to Metal Complexes in Macromolecules	3
1.2.1 Formation of Silver Polymer Complexes	3
1.2.2 Olefin Binding and Reversibility	4
1.2.3 Formation of Metalloporphyrin-Polymer Complexes	8
1.2.4 Oxygen-Binding and Reversibility	12
1.3 Small Molecule Transport Through Membranes of Metal Complexes in Macromolecules	17
1.3.1 Membrane Gas Separation	17
1.3.2 Formation of Silver Polymer Complexes	20
1.3.3 Facilitated Oxygen Transport	22
1.3.4 Other Small Molecule Transport	25
1.4 Other Applications of Metal Complexes in Macromolecules with Small Molecule-Binding Abilities	25
Reference	30
 Chapter 2 Reversible Oxygen-Binding to Simple and Planar Cobaltporphyrins Combined with Polymeric Imidazole	 35
2.1 Introduction	35
2.2 Experimental	35
2.3 Reversible Oxygen-Binding in Cooled Solution	37
2.4 Affinity and Kinetic Parameters	38
2.5 Extrapolation to Room Temperature	39
2.6 Reversible Oxygen-binding and Kinetics of the CoOEP-OIm membrane at low temperature	40
Reference	42

Chapter 3 Preparation and Structure of the Thin Membrane of Polymeric Cobaltporphyrin Complex	43
3.1 Introduction	43
3.2 Experimental	44
3.3 Membrane preparation and morphology of the CoTPP-OIm membrane	47
3.4 Complexation of CoTPP with polymer ligand	50
3.5 CoTPP concentration profile of the CoTPP-OIm membrane	51
Reference	52
Chapter 4 Facilitated Oxygen Transport through the Polymeric Cobaltporphyrin Membrane	55
4.1 Introduction	55
4.2 Experimental	56
4.3 Effect of CoTPP as an oxygen carrier	57
4.4 CoTPP-OIm Membrane preparation with different active CoTPP fractions in a same physical properties	58
4.5 Effect of upstream pressure on oxygen permeability coefficient	59
4.6 Effect of temperature on oxygen permeability coefficient	60
4.7 Oxygen enrichment from air at a one-shot permeation	61
Reference	62
Chapter 5 Analysis of Facilitated Oxygen Transport through the Polymeric Cobaltporphyrin Membrane with a Fluctuation Concentration Model	65
5.1 Introduction	65
5.2 Experimental	66
5.3 Theoretical Background	67
5.4 Effect of membrane thickness on the facilitated transport	70
5.5 Effect of equilibrium constant of the oxygen-binding on the facilitated transport	68
5.6 Analysis of the facilitated oxygen transport with the concentration fluctuation model	69
Reference	72

Chapter 6 An Optical Sensing Material for Trace Analysis of Oxygen. Metalloporphyrin Dispersed in Poly(1-trimethylsilyl- 1-propyne)Film	75
6.1 Introduction	75
6.2 Experimental	76
6.3 Spectroscopic properties of OEP metal complex dispersed in the poly(TMSP) film	79
6.4 Luminescence spectrum change of OEP metal complex dispersed in the poly(TMSP) film by oxygen	80
6.5 Stern-Volmer relationship for OEP metal complex dispersed in the poly(TMSP) film	81
6.6 Operational Stability, and Response Time of OEP Metal Dispersed in the Poly(TMSP) Film	83
6.7 Conclusions	85
Reference	85
Chapter 7 Conclusion and Future Prospects	87
7.1 Conclusion	87
7.2 Future Prospects	89
Reference	90
<i>List of Publications</i>	93
<i>Acnowledgement</i>
